

Banking FAQ Knowledge Base

RAG-Optimised Reference Document

Prepared by: Banking Domain Knowledge Team

Version: 1.0 | May 2025

This document contains 50+ frequently asked questions organised across 8 banking categories. Each FAQ includes a clear, concise answer and alternate phrasings to support accurate retrieval by a Retrieval-Augmented Generation (RAG) chatbot deployed in a banking application.

Confidential — For Internal Use Only

Table of Contents

1. Account Management
2. Transactions and Payments
3. Cards — Debit and Credit
4. Online and Mobile Banking
5. Loans and EMI
6. Charges and Fees
7. Security and Fraud
8. KYC and Documentation

1. Account Management

Q: How do I open a savings account with your bank?

A: You can open a savings account online through our website or mobile app, or by visiting any branch. You will need to submit valid KYC documents such as your Aadhaar card, PAN card, and a passport-size photograph. A minimum initial deposit may be required depending on the account type. Once your documents are verified, your account is typically activated within 1 to 2 business days.

Alternate Questions:

- How can I create a new bank account?
- What is the process to open a savings account online?

Q: How can I check my account balance?

A: You can check your account balance through several convenient methods: log in to our mobile banking app or internet banking portal, call our 24x7 customer care helpline, send an SMS in the format BAL to our registered number, or visit the nearest ATM. Missed call banking is also available — simply give a missed call from your registered mobile number to receive your balance via SMS instantly.

Alternate Questions:

- What is my current account balance?
- How do I find out how much money is in my account?

Q: My account has been frozen. What should I do?

A: An account may be frozen due to incomplete KYC, suspicious activity, or a legal order. Please contact our customer care team immediately or visit your home branch with valid identity proof. If the freeze is due to KYC non-compliance, submitting the required documents will typically restore access within 2 to 3 working days. You will not be able to withdraw or transfer funds while the account is frozen.

Alternate Questions:

- Why is my bank account blocked?
- My account is not letting me transact — what happened?

Q: How do I update my mobile number linked to my bank account?

A: To update your registered mobile number, visit the nearest branch with a filled-in request form and original identity proof, as mobile number changes cannot be done remotely for security reasons. Some banks also allow this update through the ATM using your debit card and PIN. Once updated, you will start receiving OTPs and transaction alerts on the new number. The change is usually effective within 24 hours.

Alternate Questions:

- Can I change my registered phone number for banking?
- How do I update my contact number with the bank?

Q: What is the minimum balance requirement and what happens if I don't maintain it?

A: The minimum balance requirement varies by account type — typically ranging from zero for basic savings accounts to Rs. 5,000 or more for premium accounts. If your balance falls below the required minimum, the bank will levy a non-maintenance charge, which is automatically debited from your account. Repeated non-maintenance can also impact your credit profile. You can check the specific requirement for your account type in the account terms or by contacting customer care.

Alternate Questions:

- *What happens if my account balance goes below the minimum?*
 - *Will I be charged if I don't keep enough balance in my account?*
-

Q: How do I close my bank account?

A: To close your account, visit your home branch and submit an account closure request form along with your passbook, unused cheques, and debit card. Ensure that all outstanding dues are cleared and no active auto-debits or EMI's are linked to the account before requesting closure. If the account is less than 12 months old, a closure fee may apply. The remaining balance will be returned to you via cheque or transferred to another account as per your request.

Alternate Questions:

- *I want to close my savings account. How do I do that?*
 - *What is the process for account closure?*
-

Q: Can I have more than one savings account in the same bank?

A: Yes, most banks allow you to hold multiple savings accounts, subject to their internal policies and account type eligibility. Each account will have its own account number and may have different minimum balance requirements. However, you must maintain the minimum balance in each account individually to avoid non-maintenance charges. Contact your branch or customer care to open an additional savings account.

Alternate Questions:

- *Is it possible to open two savings accounts in one bank?*
 - *Can I have a second account with the same bank?*
-

2. Transactions and Payments

Q: My money got debited but the transaction failed. When will I get a refund?

A: This is a common scenario in failed IMPS, NEFT, UPI, or card transactions. If the amount was debited but not credited to the beneficiary, the bank initiates an automatic reversal. For UPI transactions, the refund is typically credited within 2 to 3 business days. For NEFT or IMPS, reversals may take up to 5 business days. If the amount is not reversed within the stipulated time, please raise a dispute through our app, internet banking, or customer care with your transaction reference number.

Alternate Questions:

- Money was deducted but the payment failed — where did it go?
- Transaction failed but amount was debited from my account.

Q: What is the difference between NEFT, RTGS, and IMPS?

A: NEFT (National Electronic Funds Transfer) processes transactions in batches and is available 24x7; it is suitable for non-urgent transfers of any amount. RTGS (Real Time Gross Settlement) processes transactions in real time and is used for high-value transfers of Rs. 2 lakh and above. IMPS (Immediate Payment Service) enables instant fund transfers 24x7, including weekends and holidays, and is ideal for urgent transactions up to Rs. 5 lakh. Charges and processing times differ across these modes.

Alternate Questions:

- What is the difference between NEFT and IMPS?
- Which is faster — RTGS or NEFT?

Q: How long does an NEFT transfer take to reach the beneficiary?

A: NEFT transactions are processed in half-hourly batches throughout the day, 24 hours a day, 7 days a week, including bank holidays. Under normal circumstances, the transfer is credited to the beneficiary's account within 2 hours of initiation. In rare cases involving technical issues or incorrect account details, the amount is returned to the sender's account within 2 working days. Always double-check the IFSC code and account number before initiating an NEFT transfer.

Alternate Questions:

- When will my NEFT transfer be credited?
- How much time does NEFT take to process?

Q: I accidentally transferred money to the wrong account. Can I get it back?

A: If you have transferred funds to a wrong account, immediately contact our customer care helpline or visit your branch with the transaction details. The bank will send a request to the recipient's bank to reverse the funds, but recovery depends on the cooperation of the recipient. RBI guidelines require the recipient's bank to respond within 2 working days. In cases where the recipient refuses to return the funds, you may need to file a complaint with the Banking Ombudsman or pursue legal recourse.

Alternate Questions:

- I sent money to wrong account — how do I reverse it?
- Wrong account number — can the bank recover my transfer?

Q: What is the daily transaction limit for fund transfers?

A: Transaction limits vary by payment mode. For UPI, the per-transaction limit is typically Rs. 1 lakh per day, though some banks and apps may set it lower. IMPS allows up to Rs. 5 lakh per transaction. NEFT and RTGS do not have an upper cap set by RBI, but your bank may apply internal limits based on your account type. You can check and modify your transaction limits through internet banking or by contacting customer care.

Alternate Questions:

- How much money can I transfer in a day?
- What is the maximum limit for online fund transfer?

Q: Why is my UPI payment failing repeatedly?

A: UPI payment failures can occur due to several reasons: incorrect UPI PIN, wrong beneficiary VPA (Virtual Payment Address), insufficient account balance, daily limit exceeded, or temporary server issues with NPCI or your bank. Check that your UPI app is updated and your registered mobile number is active. If the issue persists, try unlinking and relinking your bank account in the UPI app, or contact your bank's customer care to check for any account-level restrictions.

Alternate Questions:

- My UPI payment keeps failing — what should I do?
- Why is Google Pay or PhonePe not working for my account?

Q: Can I schedule a future-dated payment through internet banking?

A: Yes, our internet banking platform allows you to schedule NEFT transfers for a future date and set up standing instructions for recurring payments. Simply select the 'Schedule Transfer' option while initiating a payment, choose the desired date, and confirm. The system will automatically process the transfer on the scheduled date, provided your account has sufficient funds. You can view, modify, or cancel scheduled transactions from the 'Scheduled Payments' section.

Alternate Questions:

- How do I set up a future-dated bank transfer?
- Can I automate a regular monthly payment through net banking?

3. Cards — Debit and Credit

Q: How do I block my debit card if it is lost or stolen?

A: You should block your debit card immediately to prevent unauthorised transactions. You can do this instantly through our mobile banking app under 'Card Services', through internet banking, by calling our 24x7 customer care helpline, or by sending an SMS in the format BLOCK DEBIT to our registered number. Once blocked, your card cannot be used for any transactions. You can request a replacement card through the same channels, which will be delivered to your registered address within 5 to 7 working days.

Alternate Questions:

- My debit card is missing — how do I block it quickly?
- How do I hotlist my ATM card if I lost it?

Q: My credit card payment is due — what happens if I miss it?

A: If you miss your credit card payment due date, the bank will charge a late payment fee and apply interest on the outstanding amount from the due date. Your credit score may also be negatively impacted if the payment remains overdue. To avoid this, you can set up an auto-pay mandate for the minimum amount due or the full outstanding balance. Even paying the minimum amount due on time will protect you from late fees, although interest will still accrue on the remaining balance.

Alternate Questions:

- What happens if I don't pay my credit card bill on time?
- I missed my credit card due date — will there be a penalty?

Q: How do I increase my credit card limit?

A: You can request a credit limit increase through our mobile app, internet banking, or by calling customer care. The bank evaluates your request based on your repayment history, income, credit score, and overall credit profile. If eligible, the enhanced limit is typically applied within 3 to 5 working days. Maintaining a good repayment track record and a credit utilisation ratio below 30% improves your chances of getting a limit enhancement.

Alternate Questions:

- Can I get a higher limit on my credit card?
- How do I apply for credit card limit enhancement?

Q: My card got declined at a POS terminal even though I have enough balance. Why?

A: A card decline at a POS terminal despite sufficient balance can happen due to several reasons: the card may be disabled for in-store transactions, the merchant's terminal may be offline, the transaction may have exceeded your daily POS limit, or there may be a chip-related issue with the card. Check your card settings in the mobile app to ensure in-store and contactless payments are enabled. If the issue persists, contact customer care or try using a different payment mode.

Alternate Questions:

- My debit card is being declined at shops — why?
- Card swipe not working even with balance available — what do I do?

Q: How do I convert a large credit card purchase into EMI?

A: You can convert eligible credit card transactions into EMI through our mobile app or internet banking by navigating to 'Card Services' and selecting 'Convert to EMI'. Choose the transaction you wish to convert and select the preferred tenure (3, 6, 12, or 24 months). A processing fee and applicable interest rate will be shown before confirmation. EMI conversion requests are usually processed within 24 hours and the EMI amount will reflect in your next billing cycle.

Alternate Questions:

- Can I pay my credit card bill in instalments?
- How do I convert my credit card transaction to EMI?

Q: What should I do if I see an unknown transaction on my credit card statement?

A: If you notice an unrecognised transaction on your credit card statement, raise a dispute immediately through our app, internet banking, or by calling customer care. You must report disputed transactions within 30 days of the statement date. The bank will initiate a chargeback investigation with the merchant's acquiring bank. During the investigation, you are not required to pay the disputed amount. If the dispute is resolved in your favour, the amount will be credited back to your card.

Alternate Questions:

- There is a transaction I did not make on my credit card — what do I do?
- How do I dispute an unauthorised charge on my card?

Q: How can I set or change the PIN for my debit or credit card?

A: You can set or change your card PIN through our mobile banking app under 'Card Services', at any of our ATMs using the 'PIN Change' option, or through internet banking. You will need your card number and registered mobile number to receive the OTP for verification. Always choose a PIN that is not easily guessable — avoid birth dates or sequential numbers. Never share your PIN with anyone, including bank employees.

Alternate Questions:

- How do I reset my ATM PIN?
- I forgot my debit card PIN — how can I change it?

4. Online and Mobile Banking

Q: I forgot my internet banking password. How do I reset it?

A: You can reset your internet banking password online by clicking 'Forgot Password' on the login page. You will be prompted to enter your Customer ID or registered email address, after which an OTP will be sent to your registered mobile number. Enter the OTP, set a new password, and confirm. If you do not have access to your registered mobile number, visit your nearest branch with valid identity proof to reset your credentials. Password changes are effective immediately.

Alternate Questions:

- How do I recover my net banking password?
- My internet banking login is not working — password reset help.

Q: How do I register for mobile banking?

A: Download our official mobile banking app from the Google Play Store or Apple App Store. Open the app and select 'New User Registration'. Enter your account number and registered mobile number, verify with the OTP sent to your mobile, and create an MPIN. Ensure you are using the SIM card associated with your registered mobile number on the device during registration. If you face issues, visit your nearest branch or call customer care for assisted registration.

Alternate Questions:

- How do I activate mobile banking on my phone?
- How to set up our bank's mobile app for the first time?

Q: My mobile banking app is showing an error and not letting me log in. What should I do?

A: First, check your internet connection and ensure the app is updated to the latest version. Clear the app cache through your phone's settings and try logging in again. If you have entered the wrong MPIN multiple times, your access may be temporarily locked — wait 30 minutes or reset your MPIN through the 'Forgot MPIN' option. If the error persists, uninstall and reinstall the app. For continued issues, contact our customer care helpline.

Alternate Questions:

- Banking app is not opening — how do I fix it?
- I am unable to log into the mobile banking app.

Q: How do I add a new payee or beneficiary for online transfers?

A: Log in to internet banking or the mobile app, go to 'Transfer Funds' and select 'Add Beneficiary'. Enter the beneficiary's account number, IFSC code, name, and account type, then confirm with the OTP sent to your registered mobile number. For security reasons, there is typically a cooling period of 4 to 24 hours before you can transfer funds to a newly added beneficiary. This period helps protect you against unauthorised transfers.

Alternate Questions:

- How to add a new recipient for bank transfer online?
- How do I register a new payee in net banking?

Q: Is it safe to use mobile banking on a public Wi-Fi network?

A: It is strongly advisable not to use mobile banking over public Wi-Fi networks, as they can be unsecured and vulnerable to interception by cybercriminals. Always use mobile banking over your personal mobile data network or a trusted private Wi-Fi connection. Ensure your device has the latest security updates installed. Our app uses 256-bit encryption and multi-factor authentication, but the underlying network security also plays a critical role in protecting your data.

Alternate Questions:

- *Can I do banking on public Wi-Fi safely?*
 - *Is mobile banking secure on shared or public internet?*
-

Q: How do I download my bank account statement from the app?

A: Log in to the mobile banking app, go to 'Account Summary' and select the relevant account. Choose 'Download Statement', select the date range (up to 12 months is typically available), and choose the format — PDF or Excel. The statement will be sent to your registered email address or made available for direct download within the app. For statements older than 12 months, please visit your branch or submit a written request.

Alternate Questions:

- *How do I get my bank statement from the app?*
 - *Can I download a PDF of my account transactions?*
-

5. Loans and EMI

Q: How do I apply for a personal loan?

A: You can apply for a personal loan online through our website or mobile app under the 'Loans' section, or by visiting your nearest branch. You will need to submit KYC documents, income proof (salary slips, ITR, or bank statements), and employment details. Loan eligibility is assessed based on your income, credit score, existing liabilities, and repayment capacity. If approved, the loan amount is typically disbursed to your account within 1 to 3 working days.

Alternate Questions:

- What is the process to get a personal loan?
- How can I borrow money from the bank for personal use?

Q: My EMI was not deducted this month — what happens now?

A: If your EMI was not deducted due to insufficient funds in your account, it will be treated as a bounced EMI. The bank will typically retry the deduction within a few days. A bounce charge will be applied to your account, and the missed payment will be reported to credit bureaus, which can negatively affect your CIBIL score. Make sure to top up your account immediately and contact customer care to arrange for the missed EMI to be collected at the earliest.

Alternate Questions:

- My loan EMI bounce — what is the penalty?
- EMI was not deducted from my account this month — is that a problem?

Q: Can I prepay my loan or pay it off early?

A: Yes, you can prepay your loan either partially or in full before the loan tenure ends. For floating rate loans, RBI guidelines prohibit prepayment penalties for individual borrowers. For fixed-rate loans, a prepayment charge of 2% to 4% of the outstanding principal may apply. Partial prepayments reduce either your EMI amount or the loan tenure depending on your preference. Contact your loan relationship manager or visit the branch to initiate a prepayment.

Alternate Questions:

- Can I close my loan before the end of the tenure?
- Is there a penalty for early loan closure?

Q: How is my EMI amount calculated?

A: Your EMI (Equated Monthly Instalment) is calculated based on the loan amount (principal), the rate of interest, and the loan tenure. The formula used is the standard reducing balance method, where interest is calculated on the outstanding principal each month. As you repay, a larger portion of each subsequent EMI goes towards the principal. You can use our online EMI calculator on the website or app to estimate your monthly payment before applying.

Alternate Questions:

- How does the bank calculate EMI for a loan?
- What factors affect my loan EMI amount?

Q: What is the difference between a fixed and floating interest rate on a home loan?

A: A fixed interest rate remains constant throughout the loan tenure, giving you predictable EMIs regardless of market rate changes. A floating rate is linked to an external benchmark (like the RBI repo rate) and can change periodically — your EMI may increase or decrease accordingly. Fixed rates are usually slightly higher than floating rates at the time of loan origination. Floating rate loans benefit borrowers when interest rates decline, whereas fixed rate loans offer stability when rates rise.

Alternate Questions:

- *Should I choose fixed or floating interest rate for my home loan?*
- *What does floating rate mean in a housing loan?*

Q: How do I get a loan statement or repayment schedule?

A: Your loan repayment schedule (amortisation schedule) is provided at the time of loan disbursal. You can also download it anytime from the mobile banking app under 'My Loans', or from internet banking under 'Loan Accounts'. For a provisional interest certificate (useful for tax purposes), request it through the app or by visiting your branch. Annual loan statements are also emailed to your registered email address at the end of each financial year.

Alternate Questions:

- *How do I get my loan repayment schedule?*
- *Can I get a certificate of interest paid on my loan for taxes?*

Q: My CIBIL score is low — can I still get a loan?

A: A low CIBIL score (below 650) significantly reduces loan approval chances, as it indicates past repayment irregularities. However, some banks may still consider your application if you have a stable income, a co-applicant with a good credit score, or offer collateral. You can improve your credit score by clearing outstanding dues, reducing credit card utilisation, and maintaining timely repayments over 6 to 12 months. Secured loans like gold loans or loans against fixed deposits are easier to obtain with a low credit score.

Alternate Questions:

- *Can I get a loan with a bad credit score?*
- *Will the bank reject my loan because of low CIBIL?*

6. Charges and Fees

Q: Why was I charged for using another bank's ATM?

A: RBI allows free ATM transactions up to 5 per month at other bank ATMs in metro cities, and up to 5 per month at your own bank's ATMs. Beyond this limit, a charge of Rs. 21 per transaction is levied. In non-metro locations, you are allowed 5 free transactions at other bank ATMs per month. Always check how many free transactions you have used before withdrawing from a non-home bank ATM to avoid unnecessary charges.

Alternate Questions:

- Why did the bank deduct money for ATM usage?
- How many free ATM transactions do I get per month?

Q: What are the charges for a bounced cheque or failed ECS/NACH mandate?

A: If a cheque is returned due to insufficient funds, the bank levies a cheque bounce charge, typically ranging from Rs. 300 to Rs. 800 depending on your account type and the cheque amount. Similarly, failed ECS or NACH mandates (used for EMI or bill payments) attract a return charge. These charges are automatically debited from your account. Repeated cheque bounces can also affect your creditworthiness and lead to legal action by the payee.

Alternate Questions:

- How much is the penalty for a bounced cheque?
- What happens if my NACH debit fails?

Q: Are there any charges for NEFT or IMPS transfers?

A: RBI has mandated that banks do not charge customers for NEFT transactions initiated through online channels (internet banking or mobile app). However, NEFT transactions initiated at a branch may attract a nominal charge. IMPS transfers may carry a charge of Rs. 2.50 to Rs. 25 per transaction depending on the amount and your bank's fee structure. UPI transactions are currently free for customers. Always check your bank's current fee schedule as charges may change.

Alternate Questions:

- Is there a fee for transferring money via NEFT?
- Do I get charged for doing IMPS from mobile banking?

Q: What are the annual fees for my credit card and can they be waived?

A: Credit card annual fees vary by card type — from zero for basic cards to several thousand rupees for premium cards. Many banks waive the annual fee if you meet a minimum annual spend threshold. You can call customer care before the renewal date to request a fee waiver, especially if you have been a loyal customer with good usage. If a waiver is not possible, consider downgrading to a no-fee variant. Check your card's terms and conditions for spend-based waiver eligibility.

Alternate Questions:

- Can I get the annual fee on my credit card waived?
- How do I avoid paying the yearly credit card fee?

Q: Why was a GST charge added to my banking fees?

A: GST (Goods and Services Tax) at 18% is applicable on most banking service charges including processing fees, annual card fees, IMPS/RTGS charges, and locker rent. This is mandated by the government and is not a bank-specific charge. GST is not applicable on interest earned on deposits or charged on loans. Your bank statement will show the base charge and the GST component separately for transparency.

Alternate Questions:

- *Why is there a GST amount on my bank charges?*
- *Is GST charged on bank transaction fees?*

Q: Are there charges for issuing a duplicate passbook or account statement?

A: A duplicate passbook is typically issued free of charge or for a nominal fee of Rs. 50 to Rs. 100 at the branch. Account statements for the current financial year are usually available free of charge through internet banking and the mobile app. Statements for previous financial years or certified statements may attract a charge of Rs. 100 to Rs. 250 depending on the period. Requests for physical statements sent by post may also carry an additional courier charge.

Alternate Questions:

- *How much does it cost to get a duplicate passbook?*
- *Is there a fee to request an old bank statement?*

7. Security and Fraud

Q: I received an OTP I did not request. What should I do?

A: An unrequested OTP on your registered mobile number could indicate that someone is attempting to access your account using your credentials. Do not share this OTP with anyone under any circumstances — bank employees will never ask for your OTP. Change your internet banking password and MPIN immediately and check for any recent or unauthorised transactions. If you suspect account compromise, call our customer care immediately to place a temporary hold on your account.

Alternate Questions:

- I got an OTP without doing any transaction — is something wrong?
- Someone might be trying to hack my account — I got a random OTP.

Q: I think I have been scammed — someone asked for my OTP and I shared it. What do I do?

A: If you have shared your OTP, card details, or banking credentials with an unknown person, act immediately. Call our 24x7 customer care helpline to block your account, debit card, and credit card. Report the fraud to the National Cyber Crime portal at cybercrime.gov.in and file a police complaint. Under RBI guidelines, if you report the fraud within 3 working days, your liability for the unauthorised transaction may be significantly limited. Do not delay — the faster you report, the better the chance of recovery.

Alternate Questions:

- I was tricked into giving my OTP to a scammer — how do I report it?
- I shared my bank details with a fraudster — what steps to take now?

Q: How does the bank protect my account from unauthorised access?

A: We use multiple layers of security to protect your account: two-factor authentication (2FA) for all logins, end-to-end encryption for data transmission, real-time transaction alerts via SMS and email, and AI-based fraud detection that flags unusual transactions. We also employ device binding for mobile banking and time-based session expiry. You can further secure your account by enabling login notifications and setting up transaction limits through the app.

Alternate Questions:

- What security measures does the bank use for online banking?
- How do I know my internet banking is safe?

Q: What is phishing and how can I identify a fake bank email or message?

A: Phishing is a type of cyber fraud where criminals send fake emails, SMS messages, or WhatsApp messages that appear to be from your bank, asking you to click on a link and enter your account details or OTP. Legitimate bank communications will never ask for your password, OTP, or full card number. Always check the sender's email address carefully, look for spelling errors, and avoid clicking on links in unsolicited messages. Access your bank only through the official app or by typing the official website URL directly in your browser.

Alternate Questions:

- How do I identify a fake email claiming to be from my bank?
- What is a phishing attack and how do I avoid it?

Q: I notice an unauthorised transaction on my account. How quickly must I report it?

A: You should report any unauthorised transaction immediately upon noticing it, ideally within 24 hours. Under RBI guidelines, if the fraud occurred due to bank negligence (not due to your sharing credentials), you bear zero liability irrespective of when you report it. If you report within 3 working days, your maximum liability is limited to Rs. 5,000 to Rs. 10,000 depending on account type. If you report after 7 days, you may bear a larger portion of the loss. Contact customer care via phone, in-app chat, or visit your branch.

Alternate Questions:

- *How do I report a fraud transaction on my account?*
- *Someone made a transaction without my permission — what is my liability?*

Q: What is vishing (voice phishing) and how do I protect myself?

A: Vishing is a scam where fraudsters call you posing as bank officials, RBI representatives, or government employees, and pressure you into sharing sensitive details like OTP, CVV, or account numbers. They may claim your account is being blocked, or that you have won a prize to create urgency. Real bank employees and RBI officials will never call to ask for your OTP, PIN, or card details. If you receive such a call, hang up and report the number to our customer care or the cybercrime portal.

Alternate Questions:

- *I got a call from someone pretending to be from the bank — is it fraud?*
- *How do I know if a caller claiming to be from the bank is real?*

Q: How do I enable or disable international transactions on my card?

A: You can enable or disable international usage for your debit or credit card through our mobile banking app under 'Card Controls'. Alternatively, this can be done through internet banking or by calling customer care. It is recommended to enable international transactions only when you are travelling abroad and disable them upon return to reduce the risk of fraudulent overseas charges. Real-time alerts will notify you of any international transaction on your card.

Alternate Questions:

- *How do I turn on international payments on my debit card?*
- *Can I block my card from being used outside India?*

8. KYC and Documentation

Q: What documents are needed for KYC in a bank account?

A: For KYC (Know Your Customer) compliance, you need to submit a valid Proof of Identity (POI) and Proof of Address (POA). Acceptable POI documents include Aadhaar card, PAN card, Passport, Voter ID, or Driving Licence. For POA, you can submit Aadhaar card, Passport, utility bills (not older than 3 months), or a rent agreement. A recent passport-size photograph is also required. If the address in your identity document differs from your current address, a separate address proof is mandatory.

Alternate Questions:

- What are the KYC documents required to open a bank account?
- Which documents does the bank accept for identity verification?

Q: My KYC is pending or expired — what will happen to my account?

A: If your KYC is pending or expired, the bank is required to restrict account operations under RBI guidelines. Initially, you may only be allowed to receive credits but not make withdrawals or transfers. If KYC is not updated within the stipulated time, the account may be fully frozen. To re-activate the account, visit your nearest branch with valid KYC documents and submit a fresh KYC form. Video KYC (V-KYC) is also available for certain account types if you cannot visit a branch.

Alternate Questions:

- What happens if I don't update my KYC?
- My bank account is frozen because of KYC — how do I fix it?

Q: Can I complete KYC online without visiting the bank?

A: Yes, many banks offer Video KYC (V-KYC), which allows you to complete the KYC process via a video call with a bank official. You will need to display your original Aadhaar and PAN card during the call, and the session is recorded for compliance. V-KYC is available through our app during designated hours. Aadhaar-based e-KYC (using OTP verification) is also available for eligible customers. Physical branch visit is still required for certain premium account types.

Alternate Questions:

- Is online KYC available without going to the branch?
- How does video KYC work for bank account verification?

Q: Do I need to submit my PAN card for a bank account? What if I don't have one?

A: PAN (Permanent Account Number) card submission is mandatory for accounts where aggregate credits exceed Rs. 2.5 lakh in a financial year, or for Fixed Deposits above Rs. 50,000. If you do not have a PAN card, you can submit Form 60 as a declaration. However, it is strongly advisable to obtain a PAN card to avoid TDS (Tax Deducted at Source) being applied at higher rates on interest income. You can apply for a PAN card online through the NSDL or UTIITSL portal.

Alternate Questions:

- Is a PAN card mandatory for a bank account?
- What can I submit instead of PAN card for KYC?

Q: How do I update my address in my bank account records?

A: To update your address, visit the nearest branch and submit an address change request form along with a valid address proof such as Aadhaar, Passport, or a recent utility bill. Some banks allow address updates through the mobile app or internet banking using Aadhaar-based OTP verification. The update is typically reflected within 2 to 3 working days. After the update, your registered address for statement delivery and bank correspondence will change accordingly.

Alternate Questions:

- *How do I change my address in the bank?*
- *I moved to a new house — how do I update my bank address?*

Q: What is a nomination and how do I add a nominee to my account?

A: A nominee is a person you designate to receive your account balance in the event of your death. Adding a nominee is highly recommended as it simplifies the claim process for your family. You can add or change a nominee through the mobile banking app, internet banking, or by submitting a DA1 form at the branch. You can nominate only one person per account. The nominee's name and relationship to you are recorded, and they are required to submit documentation at the time of claim.

Alternate Questions:

- *How do I add a nominee to my bank account?*
- *Can I change the nominee on my savings account?*

Q: Why is the bank asking for re-KYC when I already submitted documents?

A: Banks are required by RBI to periodically refresh KYC records to ensure customer data remains accurate and current. The frequency depends on your risk category: high-risk customers every 2 years, medium-risk every 8 years, and low-risk every 10 years. Re-KYC can often be completed digitally through the app using Aadhaar OTP-based verification. It does not mean there is a problem with your account — it is a standard regulatory compliance requirement.

Alternate Questions:

- *Why is the bank asking me to do KYC again?*
- *I submitted KYC documents before — why is re-KYC required?*
